

Learn at Lunch 42: 16 July (12:30) Clinical Audit: where are we in 2026?

Join us to consider where clinical audit stands in England in 2026. Are we:

- World champions
- Amongst the best in the business
- Off the pace and missing the target
- Out of touch?

This extended 90-minute session is open to a maximum of 100 participants and will explore the results of the ground-breaking CASC and Healthcare Quality Quest survey. Over 100 responses have been received, mainly from clinical audit professionals, with over 80 A4 pages of quantitative and qualitative data to review and unpick.

The feedback on national clinical audits is frank and we will explore whether local or national audits works best for improving patient care. The survey explores key relationships in our community, focuses on long-standing issues and looks at changes that need to happen now to ensure that the clinical audit profession thrives in future.

To book, simply email info@clinicalauditsupport.com. Note: we take no gmail bookings or bookings on behalf of others. The session will run from 12.30 to 14.00. Those attending must have cameras on, or will be removed from the session. We want full engagement for this event.
