

Maternity QI Network

STUFF WE LIKE: NUMBER 13

At the time of compiling this information flyer there were 169 members of this online QI Network. Given the huge scrutiny that Maternity Services find themselves under in 2026 on the back of the two recent Ockenden Reports, it is great to see a dedicated resource enabling those with an interest in QI to share challenges, tools and ideas.

THE 3 KEY ELEMENTS

The 'QI Projects' folder puts a spotlight on key topics and allows members to share resources. As an example, the folder includes information and case studies on: PPH, the Induction of Labour, Perinatal Optimisation of the Pre-Term Infant, etc.

The online network provides a 'What's New' discussions board that empowers members to raise issues and share useful current information with their peers.

The 'QI Resources' section provides lots of information on different QI techniques, plus uploads of relevant resources that members have shared. You will find PDSA and Gap Analysis templates, plus lots of useful QI-related materials.
