

NHS Futures

STUFF WE LIKE

FutureNHS

Collaboration Platform

The strap-line advertising NHS Futures states: *'Futures is for everyone working in health and social care'*. The platform is vast and free, providing a secure place for those working across healthcare to share challenges, ideas and resources. Moreover, many leaders are members, ensuring access to key people who often answer tricky questions!

THE 3 KEY ELEMENTS

The scale of NHS Futures is truly impressive! At the time of creating this poster, NHS Futures houses over 300 separate workspaces! From GIRFT to GP Appraisals, Making Data Count to Mental Health, NHS Futures simply has it covered.

We are members of the NHS Patient Safety and NQICAN workspaces. The patient safety workspace provides fabulous insights into PSIRF and beyond. NQICAN is less active, but allows audit professionals a place to discuss key issues.

For us one of the best attributes of Futures is that details of key webinars are often shared. Moreover, leaders often record webinars and meetings and post these onto NHS Futures, thus allowing members the opportunity to watch back.
