

IMPROVEMENT FUNDAMENTALS

STUFF WE LIKE

The Improvement Fundamentals course has been set up by NHS Improvements and I undertook the course a number of years ago. If you want to expand your knowledge of quality improvement then this is an excellent starting place. Other clinical audit professionals have benefited from the course and you can read Marina Otley's excellent blog, [here](#). Join the course, [here](#).

THE 3 KEY ELEMENTS

The online course incorporates 4 modules: QI theory, QI tools, measuring for quality improvement and spreading quality improvement.

The beauty of online learning is that it is flexible and you can learn at times that suit you. The course also enables you to link with like-minded people.

Each module is made up of five 30-minute sub-modules. Therefore, if you complete each full module you gain 2.5 hours CPD. If you complete the full course it is 10 hours!

Those working in clinical audit, QI and patient safety will find this course very helpful as a starting point for learning about all aspects of quality improvement.
