- **LICENSING TO USE
CASC RESOURCE**

In 2011, CASC collaborated with HQIP to publish the hugely popular Clinical Audit Teaching Toolkit. We have now produced the sequel, but this doesn't just focus on audit. The new resource includes materials and activities for making quality improvement training interactive and memorable. Join us for what will be an action packed day on 5th November. All learners will gain hands-on experience of the new resources and be licensed to use them. We will also look at what we consider new best practice in training delivery. If you have attended our Train the Trainer course before, we are confident you will love next level training...
