

## Healthcare Leadership Day

The Clinical Audit Support Centre believe that successful teams need effective leaders.

Today healthcare is undergoing unprecedented change with staff facing huge challenges including regular CQC inspections, revalidation for clinical professionals and a plethora of improvement initiatives. Now more than ever healthcare teams will need strong leaders who motivate within their others through the uncertain times ahead. The course uses academic models to reinforce the learning but the lessons themselves are very practical. The day focuses on a model of leadership advocated by the Kings Fund report 'The Future of Leadership and Management in the NHS' one that is shared, distributed and adaptive with the focus on delivering results.

-  **LEARNERS** are provided with a comprehensive pack of leadership resources
-  **UNDERSTAND** techniques such as transformational leadership and positive psychology
-  **PRACTICAL** approaches to understanding your impact and leading without title
-  **TUTORS** focus on using approaches effectively to benefit yourself and your team
-  **ATTENDANCE** certificate is provided for revalidation/PDP purposes
-  **APPROVED** 99% of learners stated they would recommend it to others.

### ARRANGING THE COURSE IN YOUR ORGANISATION

The course is typically delivered in-house to a healthcare team. We welcome groups of local organisations that club together to share the cost of in-house training. This approach often works effectively as learners can share ideas and experiences. All learners receive certificates of attendance.

Please contact us to discuss your requirements and costs.
