All learners who join our courses and attend our training workshops can gain accreditation. This pathway explains the process in full detail.

1. **SELECT COURSE:**
   CASC offer a range of training courses in clinical audit, QI and patient safety.

2. **ATTEND:**
   Learners seeking accreditation either attend one of our workshops or complete the distance-learning component.

3. **SUBMIT WORK:**
   Depending on which course you have studied for you will either have to submit a written assignment or report.

4. **MARKING:**
   The CASC team mark work on a quarterly basis. We compare submissions with the agreed learning outcomes.

5. **MODERATION:**
   Our accrediting body periodically check a proportion of all submissions to make sure they meet the level needed for the award of certificates.
